N. B.: Strike out courses are not offered in the Department of Geology, Kabi Jagadram Roy Govt. General Degree College, Mejia

** End Semester Evaluation (Total 40 Marks) is done on the basis of Field Report (25 Marks) and Viva voce (15 Marks).

- At present the specimens of minerals, rocks and fossils; models, charts etc are lying haphazardly in the Geology Museum. After opening the college on 03.01.2022, Professors, NC and IM will be responsible for completing arrangement and labelling of the museum specimens in a systematic manner with the help of the non-teaching staffs of the college as and when required targeting the museum to be inaugurated on 22nd April, 2022 (i.e., on the next International Earth Day). Hopefully, in the current financial year, we shall be able to purchase some museum samples.
- A report on the progress of the department during the last 06 (five) years will be started to prepare after opening the college on 03.01.2022. AM will be responsible for preparing the soft copy of the report with the help of NC and IM as and when required.

UGC - RUSA 2.0 SPONSORED ONE DAY NATIONAL SEMINAR JOINTLY ORGANISED BY

Kabi Jagadram Roy Government General Degree College, Mejia
and
Department of English, Jadavpur University, Kolkata
ON

'Regional Cultures and Literatures: Locations and Linkages'

Date: 19 February, 2020, Wednesday Time: 9.00 am to 5.00 pm

Venue: Kabi Jagadram Roy Government General Degree College, Mejia. Bankura
722143.

Call for Papers

Kabi Jagadram Roy Government General Degree College, Mejia – established in 2015 – is named after Jagadram Roy, one of the poets of medieval Bengali literature, who hailed from Mejia. His most notable work – the *Adbhut Jagadrami Ramprosadi Ramayan*, a transcreation of Valmiki's *Ramayana* – was written in the last decades of the eighteenth century.

The seminar is a collaborative venture between the college and the Department of English, Jadavpur University, under RUSA 2.0. At a time when triumphal and jingoistic nationalism and sub-nationalisms are threatening to tear asunder the diverse social fabric of this country, unitary tendencies have left the local and the regional in danger of being marginalized, appropriated, distorted, homogenized, or erased. In such cases when they do receive scholarly attention, there is a tendency to regard them as fixed or static entities, rooted and limited within their respective contexts. It is against this backdrop that the seminar's aim to bring together scholarship on local and regional nodes and networks of cultural and knowledge production assumes significance. This seminar aims to look at such regional and local cultural productions as dynamic entities, and part of a network of shared ideas and influences. We therefore solicit proposals which pay attention to the processes of production as well as those of transmission, interpretation and adaptations of cultural practices.

Sub-themes

- orality, orature
- pre-print literacies
- folklore and folkways
- endangered cultural practices
- local spaces of performance
- local/ regional histories
- Local/regional physical culture or any sport
- Local/regional art,craft.
- resisting the metropole
- Indigeneity, ethnicity, majority/minority.

These sub-themes are merely indicative and any other themes related to the topic are welcome.

Time: ~ 1 hour
5 x 4 = 20

Answer any four questions

1) prove that $[\vec{x} + \vec{y}, \vec{y} + \vec{z}, \vec{z} + \vec{x}] = 2[\vec{x}, \vec{y}, \vec{z}]$

CLASS TEST EXAMINATION 2019 (SEMESTER –IV)**

Subject: Mathematics (Generic)
FM: 40

Course Code: SH/MTH/404/GE-4(42104)
Time: 2 Hr

Group: A

1. Answer the following questions:

5 × 2 = 10

- State Lipschitz condition for solving first order differential equation.
- Find the value of $\frac{1}{D^2 - a^2} \sin ax$.
- $\vec{u}(t)$ is a vector function with constant length show that $\vec{u}(t) \cdot \frac{d\vec{u}}{dt} = 0$.
- What is Wronskian value of the functions $1, \cos x, \sin x$ when $x = \pi$?
- If $\vec{a} = t\vec{i} - 6\vec{k}$, $\vec{b} = 2t - 3t\vec{j} + 4t\vec{k}$, and $\vec{c} = 2t - 4t\vec{j} + 5t\vec{k}$, then find $\vec{a} \cdot (\vec{b} \times \vec{c})$

Group: B

2. Answer all questions:

5 × 4 = 20

- Define linear differential equation.
- Solve the equation by the method of variation of parameter

$$\frac{d^2y}{dx^2} + a^2y = \tan ax$$

- Let P (1, 3, -1), Q (0, 1, 6) and R (-1, 3, 1) be the three points in space. Find the coordinate of a point S on y axis, such that the volume of the tetrahedron PQRS is 10 cubic units.
- If $\vec{\alpha} = t^2\vec{i} - t\vec{j} + (2t+1)\vec{k}$ and $\vec{\beta} = (2t-3)\vec{i} + \vec{j} - t\vec{k}$, where $\vec{i}, \vec{j}, \vec{k}$ have their usual meanings, then $\frac{d}{dt} (\vec{\alpha} \times \frac{d\vec{\beta}}{dt})$ at $t = 2$.
- Prove $[\vec{\alpha} + \vec{\beta}, \vec{\gamma} + \vec{\beta}, \vec{\gamma} + \vec{\alpha}] = 2[\vec{\alpha} \vec{\beta} \vec{\gamma}]$ that
- Find the general solution and singular solution of the differential equation $y = px + \sqrt{1 + p^2}$

Group: C

3. Answer any one question:

10 × 1 = 10

- State Picard's theorem for existence and unique solution for the differential equation $\frac{dy}{dx} = f(x, y)$ and also define the singular solution of a differential equation.

(ii) A particle moves so that its position vector is given by $\vec{r} = \cos \omega t \vec{i} + \sin \omega t \vec{j}$ where ω is a constant. Show that the velocity \vec{v} of the particle is perpendicular to \vec{r} and also show that the acceleration \vec{a} is directed towards to the origin and has magnitude proportional to the distance from the origin. 4+6

- 1.
- a) According to Tom Wingfield the social background of the play "The Glass Menagerie", by Tennessee William is the great depression of 1930's when the working class people were in complete confusion and still reeling its effects. At that time America was undergoing the same situation as it was in Spain during the Civil war which caused a great massacre of civilians in Guernica.
- c) The mentioned line is taken from Tennessee William's "The Glass Menagerie". Jim O'Connor, ~~used to call~~ the highschool love of Laura used to call her "Blue Roses". Once in her school time Laura explained to Jim that she was away from school due to an attack of a disease called 'pleurosis', but Jim misheard the name of the disease as "Blue Roses" and began to call her as "Blue Roses." But later in the play Jim explained that Laura was really very uncommon and rare like blue roses.

d) Though Amanda and Tom were mother and son by relation but the relationship ~~was~~ between them was one of dispute and argumentative. Amanda was a kind of mother who always reinforced her expectations on Tom, though he was unsatisfied with ~~his~~ his job. As a result they always had ~~an~~ disputes almost over every matter.

f) Amanda in the play "The Glass Menagerie" was very much concerned about her children. So when the moon came out she wished "happiness and good fortune" for her children. Rather it was her eternal wish.

e) The screen legend at the beginning of the scene Five was "Annunciation", ~~besides~~ which besides 'announcement', refers to the catholic celebration of angel Gabriel's announcement to virgin Mary of being pregnant with Christ. Here the announcement is the announcement of Tom to Amanda that they are going to have a gentleman caller for Laura. The gentleman caller is none other than Jim, who saved her like a Savior.

Name Sanchita Nath Roll No. 1914156

- 1) Ans:- "The Mahad Satyagraha" movement on 10th March 1927, which was initiated by B.R. Ambedkar with Dalit workers, against the upper cast Hindus is known as the "Declaration of Independence".
- 2) Ans:- In the "Second Mahad Satyagraha" movement which was initiated by Ambedkar, his followers (Dalits) burnt a copy of ~~Manusmriti~~ "Manusmriti". This Dalit movement has been compared to the "swadeshi" nationalist movement of burning foreign clothes by Ambedkar.
- 3) Ans:- The Cast Hindus' response to the Chavadar Tarak mission of the Dalits were very vicious. They became very wild and violent. They started attacking the Dalit people. Even in a attack twenty people get ~~wounded~~ wounded. At any cost they were not ready to give equal importance to the Dalits in the society. Their behaviour became so dangerous.

that including Ambedkar, the Dalit workers had to find shelter in Muslim houses. 1/2-1

d) Ans: when little Bhimrao came to know that his father had given an order to build a water tank in Goregaon by Government, on the other hand in Salara he had to suffer tremendously for a sip of water, then he comment so. He realises the fact that the upper cast's people enjoy every advantages, whereas they (so called lower class people) had to suffer for every fundamental rights. The upper class people treat them even worse than animals.

e) Ans:- A 'Detective fiction' is a genre of literature. Here the narrator narrates the story in a very suspicious manner. At the end of the story he reveals the culprit. ~~There~~ In a detective fiction we always find a detective who investigates the whole thing and find out the criminal. The subject matter of a detective fiction must be a crime, whether such as murder case, or some robbery case etc.

PART- A

Answer any three questions

$3 \times 2 = 6$

1. If $\vec{a} \times \vec{b} = \vec{c}$, $\vec{b} \times \vec{c} = \vec{a}$ and $\vec{c} \times \vec{a} = \vec{b}$ then show that $\vec{a}, \vec{b}, \vec{c}$ are mutually perpendicular.
2. Find the value of the parallelepiped whose edges are represented by the vectors $3\hat{i} - 2\hat{j} - 4\hat{k}$, $3\hat{i} - \hat{j} + 3\hat{k}$ and $\hat{i} - 2\hat{j} - \hat{k}$.
3. State the Picard's Existence and Uniqueness theorem.
4. Find the stationary point and linearize the following nonlinear system about the stationary point

$$\begin{aligned} \dot{x} &= e^{-x-3y} - 1 \\ \dot{y} &= -x(1 - y^2) \end{aligned}$$

5. Show that $x = 0$ is a regular singular point of $(2x + x^3) \frac{d^2y}{dx^2} - \frac{dy}{dx} - 6xy = 0$

PART- B

Answer any one question

$1 \times 4 = 4$

1. Show that $[\vec{b} \times \vec{c} \quad \vec{c} \times \vec{a} \quad \vec{a} \times \vec{b}] = [\vec{a} \quad \vec{b} \quad \vec{c}]^2$.
2. Solve, using the method of undetermined co-efficient $\frac{d^2y}{dx^2} + \frac{dy}{dx} - 2y = x^2e^x$.
3. Find the general solution of the following linear homogeneous system using eigenvalue-eigenvector method:
 $\dot{x} = 5x + 4y$
 $\dot{y} = x - 2y$

PART - A

Solutions

1) Given $\rightarrow \vec{a} \times \vec{b} = \vec{c}, \vec{b} \times \vec{c} = \vec{a}$ and $\vec{c} \times \vec{a} = \vec{b}$

$[\vec{a} \vec{b} \vec{c}] = \vec{a} \cdot (\vec{b} \times \vec{c})$

4+0 F

$= \vec{a} \cdot \{ (\vec{c} \times \vec{a}) \times (\vec{a} \times \vec{b}) \}$

$= \vec{a} \cdot \{ (\vec{b} \cdot \vec{b}) \vec{a} - (\vec{b} \cdot \vec{a}) \vec{b} \}$

$= \vec{a} \cdot \vec{a}$

As $[\vec{a} \vec{b} \vec{c}] = 0, \vec{a}, \vec{b}, \vec{c}$ are coplanar and \vec{a} is perpendicular to \vec{b} and \vec{c} .

$\therefore \vec{a}, \vec{b}, \vec{c}$ are perpendicular to each other.

2) Let $\vec{a} = 3\hat{i} - 2\hat{j} - 4\hat{k}, \vec{b} = 3\hat{i} + \hat{j} + 3\hat{k}, \vec{c} = \hat{i} - 2\hat{j} + \hat{k}$

Volume of parallelepiped $= [\vec{a} \vec{b} \vec{c}]$

2+

$= \begin{vmatrix} 3 & -2 & -4 \\ 3 & 1 & 3 \\ 1 & -2 & 1 \end{vmatrix}$

$= 3(1+6) - (-2)(3-3) + (-4)(-6-1)$

$= 3(7) + 0 - 4(-7)$

$= 21 + 28 = 49$ cubic units

\therefore Volume of parallelepiped = 49 cubic units

Samples displayed for NAAC assessment

3) Picard's Existence and Uniqueness theorem :-

Let $f(x, y)$ be continuous in the domain D of the (x, y) plane and M be a constant such that
 $|f(x, y)| \leq M$ in D .

Let $f(x, y)$ in D satisfy the Lipschitz condition in y namely,
 $|f(x, y_1) - f(x, y_2)| \leq K(y_1 - y_2)$
where K is independent of x, y_1, y_2 .

2+

Let R be the rectangle

Let rectangle R be defined as $|x - x_0| \leq h$ and
 $|y - y_0| \leq k$.

where $Mh \leq k$, then $|x - x_0| \leq h$ where the
differential equation $\frac{dy}{dx} = f(x, y)$ has a unique

solution $y = y(x)$ in which $y(x_0) = y_0$.

PART - B

1) Show that $\rightarrow [\vec{b} \times \vec{c} \quad \vec{c} \times \vec{a} \quad \vec{a} \times \vec{b}] = [\vec{a} \quad \vec{b} \quad \vec{c}]^2$

LHS :-

$$[\vec{b} \times \vec{c} \quad \vec{c} \times \vec{a} \quad \vec{a} \times \vec{b}]$$

$$= (\vec{b} \times \vec{c}) \cdot \{ (\vec{c} \times \vec{a}) \times (\vec{a} \times \vec{b}) \}$$

$$\text{Let } \vec{p} = \vec{c} \times \vec{a}$$

$$= (\vec{b} \times \vec{c}) \cdot \{ \vec{p} \times (\vec{a} \times \vec{b}) \}$$

$$= (\vec{b} \times \vec{c}) \cdot \{ (\vec{p} \cdot \vec{b}) \cdot \vec{a} - (\vec{p} \cdot \vec{a}) \cdot \vec{b} \}$$

$$= (\vec{b} \times \vec{c}) \cdot \{ ((\vec{c} \times \vec{a}) \cdot \vec{b}) \cdot \vec{a} - \vec{p} \cdot ((\vec{c} \times \vec{a}) \cdot \vec{a}) \cdot \vec{b} \} \quad \left[\begin{array}{l} \text{Putting the} \\ \vec{p} = \vec{c} \times \vec{a} \end{array} \right]$$

Samples displayed for NAAC assessment

$$\begin{aligned} &= (\vec{b} \times \vec{c}) \cdot \{ [\vec{c} \ \vec{a} \ \vec{b}] \cdot \vec{a} - 0 \} \\ &= (\vec{b} \times \vec{c}) \cdot \vec{a} [\vec{a} \ \vec{b} \ \vec{c}] \\ &= [\vec{b} \ \vec{c} \ \vec{a}] [\vec{a} \ \vec{b} \ \vec{c}] \\ &= [\vec{a} \ \vec{b} \ \vec{c}] [\vec{a} \ \vec{b} \ \vec{c}] \\ &= [\vec{a} \ \vec{b} \ \vec{c}]^2 \\ \text{RHS} &= [\vec{a} \ \vec{b} \ \vec{c}]^2 \end{aligned}$$

$$\therefore \text{LHS} = \text{RHS}$$

Answers

Ans 1) The significance of Maxwell's second equation $\nabla \cdot \vec{B} = 0$ is the analogous one for the magnetic field, which has no sources or sinks (no magnetic monopoles, the field lines just flow around in closed curves). Therefore the net flux out of the enclosed volume is zero.

Ans 2) The Zeroth Law of Thermodynamics states that if two bodies are each in thermal equilibrium with some third body, then they are also in equilibrium with each other. Thermal equilibrium means that when two bodies are brought into contact with each other and separated by a barrier that is permeable to heat, there will be no transfer of heat from one to the other.

Ans 3) We know that

$$\begin{aligned} \text{Magnetic Field} &= \text{Force} \times [\text{Charge} \times \text{Velocity}]^{-1} \\ &= [MLT^{-2}] \times [IT \times LT^{-1}]^{-1} \\ &= [MLT^{-2}] \times [T^{-1}L^{-1}I^{-1}] \end{aligned}$$

UID NO → 20223120002 Course Id → 22404

Part 2

$$= [MLT^{-2}] \times [I^{-1}T^{-1}] \times [L^{-1}T]$$

$$= ML^0 T^{-2} I^{-1}$$

$$= [MT^{-2}I^{-1}]$$

Magnetic Flux = $B \times A \times \cos \theta$

$$= [MT^{-2}I^{-1}] \times [L^2]$$

$$= [ML^2 T^{-2} I^{-1}]$$

[θ = dimensionless quantity]

Ans 6) Wien's Displacement law about radiation states that the black-body radiation curve for different temperatures will peak at different wavelengths that are inversely proportional to the temperature.

Ans 7) ~~Ans~~ One Ampere is the amount of current which when flowing through each of the two infinitely long straight conductor placed in vacuum distance of 1 metre apart results in a force of $2 \times 10^{-7} \text{ Nm}^{-1}$ on each of the conductors.

Biot-Savart law states that the magnetic field produced at a point near a current-carrying conductor is proportional to the material of medium μ_0 , the current I flowing in the conductor, the small length of the wire dl involved, and inversely proportional to distance r between the point and the conductor,

$$dB \propto \frac{I dl \sin \theta}{r^2}$$

$$\Rightarrow dB = \frac{\mu_0 \cdot I dl \sin \theta}{4\pi r^2}$$

where, $\frac{\mu_0}{4\pi} = 10^{-7} \text{ T.m/A}$ [for free space]

i) The term fossil comes from a Latine word 'fossilis' that means 'anything having been dug out from the earth crust.'

A fossil may be whole body of organism or parts of organism, impressions of organism made as trails or ~~footprints~~ footprint and artifacts made by animals such as excreta, burrow and nest that must satisfy the below condition -

i) The objects we are recognize as fossils are all remains of organism that lived in the decent past and must be preserved in the sedimentology rocks by geologic agents.

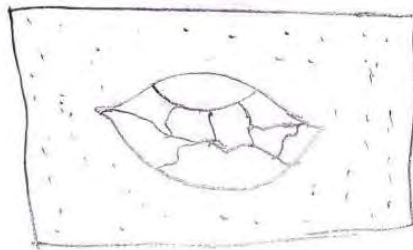

ii) A fossil must have some geologic age.

iii) It must also furnish some idea of the nature of parts or all of the body of the organism.

2) Coprolite is an example of trace fossil.

3) If water deposit mineral within the void space, where the shell has been dissolved, the mould may be filled. The mineral deposit exhibit the external surficial impression of the shell but the internal structure has destroyed. These replica of the dissolved fossil is known as cast.

①

Ore :- Ore is defined as a naturally occurring mineral or aggregate of minerals, from which metals could be extracted with profit. The term ore is generally confined to the sources of metallic minerals. The minerals having appreciable concentration of metallic elements are called as ore minerals.

②

Skarn :- This deposit also known as pyrometasomatic or contact metamorphic deposit. Skarn deposit are formed by replacement of carbonate rich sediments at contact with igneous intrusions with development of calc-silicate minerals such as deposit $Ca(Mg, Fe)Si_2O_6$.

③

GIS :- geographic information system.

④

example of placer deposits :- The minerals with a higher density are ~~found~~ deposited. Heavy minerals like gold, diamond, platinum and magnetite tend to get concentrated in areas where water current velocity is low.

Page - 2

- ⑤ Concordant one deposit :- Refers to one body which is parallel to the lithological bedding plane or banding.
- Discordant one deposit :- Refers to one body which cuts across the bedding plane or banding.
- ⑦ Black smokers ⇒ Black smokers are hot fluids issuing from mid-oceanic ridge vents and on mixing with cold ocean water give rise to fluid rich particles of black sulphide. The divergent margins on mid oceanic ridge and convergent plate boundary have underwater volcanoes which produce hot spring known as hydrothermal vents.

Enclosure:1

**FEEDBACK ANALYSIS REPORT ON ATTAINMENT OF COURSE OUTCOME
AND PROGRAM OUTCOME FOR THE ACADEMIC YEAR 2022-2023**

The Internal Quality Assurance Cell (IQAC), Kabi Jagadram Roy Government General Degree College, Mejia carried out exercises during April 2023 to assess the attainment of Course Outcomes and Programme Outcomes for the academic year 2022-2023 through analysis of feedback received from students.

❖ **Summary of Comments and Suggestions Received from Students**

English department students suggest appointing more faculty members to run the academic program smoothly. Currently, only one faculty in the Department of English organizes everything single-handedly, which hampers their regular classes. The History department demands field visits and excursions to meet their curriculum. Department of Commerce also demands enhanced computer facilities and books in taxonomoy branches.

❖ **Conclusions Drawn from the Analysis of the Feedback Reports (CO and PO Attainment) by the Students:**

All the students of the departments were asked to give feedback. A total of 224 out of 363 students submitted their feedback honestly. Based on that, a report is prepared.

- ✓ Students are satisfied with the academic course. The college students also motivate freshers to join this college to establish good academic records.
- ✓ Students are pleased with their project work entirely every year.
- ✓ Students are satisfied with the teacher's overall performance, such as completing the academic syllabus, communication skills, teaching delivery, regularity, discipline, and student-teacher relationship.
- ✓ In the teaching-learning experience, students responded positively, especially regarding the punctuality and regularity of the teacher, teaching delivery, and effective communication.
- ✓ Student counseling is maintained well, motivating students to study their courses properly.
- ✓ Although students are satisfied with the academic courses, teachers' guidance, and facilities, some issues raised to improve the quality of the teaching environment by analyzing students feedback:
 - a. Lack of books and reading materials in the central and departmental libraries.
 - b. Students suggest they should be conveyed to career establishment programs after completing the courses.
 - c. Number of home assignments and tutorial tasks should be increased.

- d. Field visits and excursion programs should be increased on a regular basis.
- e. Seminars and workshops should be organized on a regular basis to enrich students.
- f. Increase Internship Program
- g. Equipment and laboratory facilities should be enhanced to ensure the proper knowledge transfer among students.

❖ **Action Taken Report on the attainment of CO and PO:**

The detailed report of analysis of students' feedback for the attainment of PO and CO has been placed in the IQAC meeting dated 26/04/2023. After long and careful discussion, the members of the IQAC unanimously propose the office of the principal to take the following measures:

- IQAC recommends that all Heads of Departments increase the number of tutorial classes and home assignments to help the students acquire problem-solving skills.
- Although books and reading materials are of abundant quality in the library, then also requirements were taken for new books as needed and sent to the library committee through the department head after getting it verified. Also, faculties are asked to suggest books based on the NEP syllabus. The college authority will send a requisition to the Department of Higher Education to purchase the required books as per the demand of the students.
- The college administration has already sent a requisition letter to the Department of Higher Education to recruit new faculty members for the Department of English. Furthermore, the higher authority will send a reminder regarding the letter mentioned above.
- An add-on course on computer language and advanced technology should be introduced so that most students can participate.
- IQAC has also suggested that seminars, workshops, and internship programs be organized on a regular basis. This will allow our students to be enriched by eminent external professors.
- The number of computers with internet access will be increased to enhance information technology literacy.

Dear Colleagues,

You are cordially invited to attend and participate in a meeting of Internal Members of the UGBS in English, to be held over Google Meet today on 17.06.22 at 5.00 PM in order to discuss revision of the B.A. English (Programme) curricula. The link to the above meeting remains the same i.e. <https://meet.google.com/vgg-xana-hfz>.

I also attach herewith several documents which could help us in jotting down course objectives and outcomes with some uniformity for courses we shall edit:

1. A set of points collated by Dr. Malas which could be referred to, regarding course objectives and outcomes
2. The UGC template regarding course outcomes as provided by Sutista
3. Course and Programme Objectives for B.A. (Hons.) and Programme, as laid out by Bankura Christian College and provided by Dr. A. K. Biswas
4. Course and Programme Objectives for B.A. (Programme), as laid out by Ramananda College and provided by Dr. Malas

2-4 have already been sent before, but I attach them herewith so that they are easier to find and refer to, while charting the objectives outcomes for individual courses. I think the course objectives and outcomes detailed in the M.A. syllabus of BKU could also be useful, since quite a number of courses belong to convergent fields at both the levels.

Thanking you,
And looking forward to an evening of fruitful collaboration and discussion, again,
